Welcome to ScienceDirect eBooks!

Abstract

ScienceDirect workshop – find your path from hypothesis to discovery

Today's researchers have broad, multidisciplinary workflows. To connect the dots and see the big picture, they need access to reliable interdisciplinary research using a wide range of content types – not just journals.

ScienceDirect uniquely offers cross-links and advanced technology, enabling researchers to find relevant information at their point of need. The different content types work in harmony on ScienceDirect.

During this workshop you will learn:

- *What types of content are available on ScienceDirect?*
- *How to start working with ScienceDirect eBooks?*
- *What Topic Pages are and how they can help in scientific and educational processes?*
- *What co-usage is and why it is important for scientists and educators?*
- *How can you improve your language skills using ScienceDirect?*
- *How ScienceDirect may become your window to the whole scientific world?*
